Profile

Angular Developer with practical experience delivering production-ready features on enterprise client projects. Proficient in component-driven architecture, REST API integration, and performance optimization. Known for translating complex requirements into clean, scalable frontend solutions within Agile teams.

Experience

Angular Developer Intern

Jan 2026 – Jun 2026

GTSCYS Services Pvt. Ltd.

- Developed enterprise-grade web applications using Angular, TypeScript, HTML5, CSS3, and SCSS.
- Designed reusable UI components, services, and modules following Angular best practices.
- Integrated RESTful APIs and implemented authentication workflows using JWT and OAuth.
- Built analytics dashboards and admin features including file upload, email notifications, and dynamic data rendering.
- Utilized RxJS and Angular Signals for reactive state management.
- Optimized application performance through lazy loading and change detection strategies.

Technical Skills

- **Frontend:** HTML, CSS, JavaScript, TypeScript, Angular, React.js, Tailwind CSS
- **Backend:** Node.js, RESTful API, Firebase
- **Databases:** SQL, Firebase
- **Languages:** Python, C++
- **Tools:** Git, GitHub, Linux, Docker, Bash, Vercel
- **Other:** Data Structures and Algorithms (DSA)

Projects

1. InterviewReady – AI Interview Platform

GitHub

- Developed an AI-powered interview preparation platform featuring mock interviews, speech-to-text, webcam feedback, and performance analytics.
- Integrated resume builder, career chatbot, and AI-driven analysis dashboards to enhance candidate preparation.
- Improved user experience through responsive UI, real-time feedback, and modern component architecture.
- **Tech Stack:** React.js, TypeScript, Tailwind CSS, Firebase, Gemini API

2. AngBids – Online Bidding Platform

GitHub

- Contributed to the frontend development of a live online bidding platform by building responsive UI modules and integrating REST APIs.
- Collaborated with backend services developed using Laravel (PHP) and SQL databases to deliver dynamic bidding and user management features.
- Developed reusable Angular components and optimized application performance using Angular best practices.
- **Tech Stack:** Angular, TypeScript, SCSS, Laravel (PHP), SQL, REST APIs

3. Kanban Board Management System

GitHub

- Developed a Trello-inspired task management application with board creation, task management, drag-and-drop workflow, and responsive UI.
- Implemented reusable Angular components, task filtering, categorization, and state management using RxJS.
- Managed modular architecture and Git-based development workflows for scalable implementation.
- **Tech Stack:** Angular, TypeScript, SCSS, RxJS, Git

Education

CVM University – A.D. Patel Institute of Technology
B.Tech in Information Technology

CGPA: 7.97/10

2022–2026
